

EXERCISE 9

BARBARA

FRANCI

EX 14.2.5

14.2-5. Find the saddle point for the game having the following payoff table.

		Player 2			
		1	2	3	4
Strategy	1	3	-3	-2	-4
	2	-4	-2	-1	1
	3	1	-1	2	0
	4				

Use the minimax criterion to find the best strategy for each player. Does this game have a saddle point? Is it a stable game?

EX 14.2.3

14.2-3. Consider the game having the following payoff table.

		Player 2			
		1	2	3	4
Strategy	1	5	-7	-2	2
	2	-2	2	-5	5
	3	-2	5	-2	7
	4				

Determine the optimal strategy for each player by successively eliminating dominated strategies. Give a list of the dominated strategies

EXERCISE

FIND ALL NASH EQ (MAX)

$$1. \begin{bmatrix} 2,1 & 3,4 & 5,3 \\ 3,4 & 1,1 & 1,2 \end{bmatrix}$$

$$2. \begin{bmatrix} 5,2 & 1,1 \\ 0,2 & 4,3 \\ 3,0 & 4,4 \end{bmatrix}$$

$$3. \begin{bmatrix} 5,3 & 1,1 \\ 0,2 & 4,3 \\ 3,0 & 4,4 \end{bmatrix}$$

$$4. \begin{bmatrix} 5,2 & 1,1 \\ 0,2 & 4,3 \\ 2,0 & 2,5 \end{bmatrix}$$

$$5. \begin{bmatrix} 2,4 & 3,2 & 1,0 \\ 0,1 & 2,2 & 3,3 \end{bmatrix}$$
